the meeting, at the Applicant's expense, to the Applicant, owner, abutters and every engineer, architect, land surveyor, or soil or wetlands scientist whose professional seal appears on the plan.

9. The Planning Board shall first make a determination at a properly noticed public meeting as to whether an application is complete or incomplete. If the application is complete, the Board may continue with a public hearing approve or disapprove the application. Per RSA 676:4(I)c, this decision must be made within sixty-five (65) days of acceptance of the application. When possible, the Board may take action during the same meeting that an application is determined by the Board to be complete.
10. The Applicant shall receive a written notice of decision from the Planning Board which states the approval or disapproval of the application along with any conditions. This notice of decision shall be publicly posted within 72 hours in accordance with RSA 676:3.
11. After approval and fulfillment of the conditions, three 22"x34" paper copies of each final map PLUS one set of mylar maps shall be submitted to the Planning Office. All conditions of approval shall be fulfilled before the project can commence. Be aware that approvals from other Boards or other regulatory entities may be necessary after the Planning Board process has ended.

Plat Details Required for All Subdivisions and Lot Line Adjustments. Section 202-11 CONTINUED			
10. Locus map at a scale appropriate to indicate its location in the community.	X		
11. Tract boundary lines, right-of-way lines of streets, street names, easements and other right-of-way, park areas or land to be reserved or dedicated to public use.	X		
12. All lot lines and other site lines, watercourses, wetlands, flood zone locations, and base flood elevations that may exist within 250 feet of the subdivision boundaries with dimensions and soil types, with accurate dimensions, bearing or reflection angles and radii, arcs and central angles of all curves.	X		
13. In the event that a flood zone may exist within 250 feet of the subdivision boundaries, base flood elevations shall be indicated.	NA		
14. Note on the plan whether the site is within a flood zone or flood hazard area.	X		
15. Existing ground elevation contours based on acceptable photogrammetric mapping methods or ground survey with a maximum of five-foot contour intervals. Contours shall be accurate within 1/2 a contour interval. All slopes equal to or greater than 25% shall be noted.			
16. The purpose of any easement or land reserved or dedicated to public use shall be designated, and the proposed use of sites other than residential shall be noted.	X		
17. Monuments that delineate survey points shall be set on the right-of-way lines, at the beginning and end of the project, beginning and end of curves, angle points and on tangents with a maximum distance between bounds of 1,000 feet. Similar monuments shall be installed on all front lot corners at the right-of-way line and shall be installed upon the completion of the road construction but prior to the issuance of any building permits. The front lot corners for lots fronting on existing streets shall also be marked with similar monuments, at the right-of-way line. All rear lot corners shall be marked with permanent objects, i.e., iron pipes, iron pins, monuments, etc.	X		
18. The location of proposed driveways and buildings.	X		
19. Existing soils delineation based on the current "Soils Survey, Merrimack County, New Hampshire", include a legend which explains the map symbols.	X		
20. The locations of proposed individual sewage disposal systems and wells, with protective radius indicated. If individual sewage disposal systems are to be used, the location of the percolation tests and the results of such tests shall be submitted.	X		
21. Locations of all stormwater management facilities, including but not limited to catch basins, culverts, drainage swales, rip-rap areas, detention/retention areas, and dams and weirs, and/or a separate stormwater drainage plan in accordance with 202-12.	X

Requirements for Subdivisions with New Streets 202-15			
Show cross sections and profiles of proposed streets (cross sections at fifty-foot intervals plotted at one inch equals 10 feet horizontal and vertical) on a profile plan. All data shall be based on a field survey.			
For temporary turnarounds, documentation shall be submitted to demonstrate that the road terminus is suitably located to facilitate the future extension of the road into adjoining properties.			
For an extension of a street that currently ends in a "T", provide a plan for restoring the "ears" to a natural condition and a plan for continuing surface drainage.			
All applications involving new roads shall contain a drainage and watershed plan showing the entire area which is directly involved. The plan shall show areas and computed flowage volumes and shall be prepared and stamped by a registered professional engineer.			
All applications involving new roads shall contain a soil and erosion and sediment control plan, conforming to USDA NRCS standards. The plan shall include slopes, embankments, ditches, drainageways, and the affect of the subdivision on water bodies and all disturbed areas, and shall be prepared and stamped by a registered professional engineer.			
Construction Plans indicating new streets to be built to standards outlined in the Appendix.			
Requirements for Water and Wastewater. Section 202-16			
Common systems for water and wastewater shall require plans to include 2' contour intervals, well site with 200' protective radius, numbered lots, distribution system, and type of establishment served.			
Individual water and subsurface disposal systems to comply with all local and state requirements. Applicant to provide adequate information to the installation and operation of individual sewage disposal systems (tank and drain field).

October 16, 2016

RE:
Tax Map 5B Lots 103-A16 & 103-A16B
Hillside Drive
Henniker, NH 03242

Project Narrative

The above referenced properties are a part of the Hillside Drive Subdivision that was approved in 1973 prior to the town of Henniker establishing a zoning ordinance. The lots were built on in the mid 1980's and have been landscaped and maintained since then through multiple owners. The lines of occupation (areas of improvements and landscaping) and the actual lot lines differ. The owners of the affected lots have come together and are proposing this application to resolve the issue in the simplest manner possible, a lot line adjustment.
