TOWN OF HENNIKER, NH HIGHWAY DEPARTMENT

### LEGALNOTICE TOWN OF HENNIKER, NH INVITATION TO BID

#### PLOW And WING / MULTI PURPOSE BODY February 7, 2024 @ 9:00AM

Sealed bids for the purchase Plows / Multi Purpose Body, by the Town of Henniker, will be received at the Town Hall, Secretary's Office,18 Depot Hill Road, Henniker, New Hampshire 03242 until 9:00AM prevailing time, on February 7, 2021, at which time they will be publicly opened.

The bid shall be submitted in a sealed envelope, addressed to the Town of Henniker, Highway Department and clearly marked in the lower left-hand corner "Plow and Truck Body". No electronic bid documents will be accepted.

The bid document will be available at the Highway Department, at 209 Ramsdell Road beginning January 22, 2024.

The Town of Henniker reserves the right to accept or reject any and all bids or any part thereof, and to waive any minor informality as it deems to be in the best interest of the Town. The Town also reserves the right to conduct reasonable negotiations with low bidders and sole bidders. Failure to submit all information may declare a bid as non-responsive and subject to disqualification.

Superintendent of Highway Town of Henniker, NH

# Town of Henniker, N.H. Plows and Body Bid Specifications 2021

Hitch and Wing System	Yes	<u>No</u>	<b>Deviations</b>
Hitch to be of "power tilt" design.			
The hitch shall tilt forward hydraulically to provide engine access.			
Two horizontal tubes shall extend			
outward to the passenger side of the chassis to			
serve as support for the front wing post.			
The front wing post shall be welded to the hitch.			
The front wing post shall raise the nose of the wing a			
minimum of 48" by use of a direct hydraulic lift.	·		
Cable post is Unacceptable.	Yes	No	Deviations
There will be a 30-degree wing trip block.		2.73	
The rear post shall be a Semi-Detachable, with 36" of hydraulic lift.			
The rear post shall be properly braced and attached to the chassis frame rail.		<del></del>	
A steel support shall tie both chassis frame			
rails together with the rear post.			
The rear wing post shall have a three point attachmen	nt	<del></del>	_
for push arms and lift cylinder attachment.			
Push arms are adjustable in length to provide variable clearing paths.			
The bottom arm shall incorporate a compression			
spring to aid in protecting the wing components.			
A double acting lift cylinder shall be mounted between	en		
the arms to provide rear of wing lift.	. <del></del>		
A 30-degree wing trip block, shall be mounted betwee the nose	een		
of the wing and the front post to attach the wing.			
All hitch and wing mount gear shall be sandblasted,			
epoxy primed and painted black.			
Wing	Yes	No	Deviations
Cutting edge length: 10'			
Overall Length: 11'	_		
Moldboard will be roll formed and constructed from			
a minimum of seven (7) gauge <i>Hi-Tensile steel</i> and reinforced with full length ribs.			
The wing shall be punched 12" on center.			
Wing shall come complete with KUPER XT			
Armored carbide blade, one KUPER SX carbide			
curb shoes and carbide moldboard shoes.  The wing shall be sandblasted, epoxy primed, and			
painted black in the rear.			
		<del></del>	
Plow	Yes	<u>No</u>	<u>Deviations</u>
Shall be a Full trip hydraulic reversing plow, with a 3/16" Hi-tensile steel moldboard and a			
slotted canister trip mechanism.			
Cutting edge length: 11'			

Moldboard will be roll formed and constructed from a minimum of seven (7) gauge <i>Hi-Tensile steel</i> and reinforced with full length ribs.	_		
The leading edge of the plow shall have a rubber deflector and one fluorescent wire plow guide.			
Plow shall be punched 12" on center. Plow shall come complete with KUPER XT Armored carbide blade,		_	
and carbide frame shoes.  The lifting device shall be dual chain.  Moldboard steel shall		_	
painted black on the rear side.  Drive frame steel shall be sandblasted, primed with an epoxy primer and painted black.	<u> </u>	_ _	
TT 1 1'	<b>\$</b> 7	N.T.	D : 4:
Hydraulics A Tandem gear pump with an electronic clutch keyed not splined (no exceptions), the pump shall	Yes	<u>No</u>	<u>Deviations</u>
power all hydraulic functions.  A Seven section valve for implement and spreader functions shall be mounted behind		_	
the cab on the passenger side of the chassis.  All implement and spreader lines shall be plumbed with stainless steel tubing and short hose whips.	_	_	
Implement controls shall be run by Dell feathered air		<del></del>	
plow/wing & body controls.  The controls will be mounted on a pedestal in the cab with the Town's	<del></del>	<del></del>	
approval for location.  Spreader system functions shall be run with a Certified Cirus EZ Spread electronic	_	_	
sander control. No exceptions.  A minimum 40 gallon steel oil reservoir with return line filtration and ball valve shut off shall be mounted behind the cab on a	_	_	
pedestal.  There will be a low hydraulic oil level alarm in the cab of the truck.	_	_	
the cut of the truck.			
Combination Spreader/Dump Body  Heavy duty body serving as a spreader or dump body	Yes	<u>No</u>	<b>Deviations</b>
transformed by a <i>single wall</i> hydraulic tilting floor.			
Inside length: 14'		<del></del>	
Capacity: 12.35 cu/yd to 16 cu/yd with sides No taller than 39" and a tail gate no taller than 52"		<u> </u>	
Hoist cylinder; Mailhot, Single acting telescopic			
Cab shield: 24" overhang The entire body will be constructed from 1/4" & 3/16"			
Hardox 205,000 psi Hi-Tensile steel.  Standard AR400 is not acceptable, it must be Hardox 450.			
The tailgate will be double acting, six panel, and			
constructed from <sup>1</sup> / <sub>4</sub> " Hardox 205,000 psi steel. Tailgate shall be air operated and shall latch and unlatch with a double acting air cylinder. Tailgate			
will be equipped with locks on both sides			

The floor shall be constructed of 1/4" <b>Hardox</b>	 	
high tensile steel with a minimum		
205,000 psi tensile strength.		
The sides and front will be constructed of 3/16" Hardox with a minimum 205,000 psi steel strength.	 	
The understructure of the body shall consist of two 10" longitudinal I-beams.	 	
	 <del></del>	

The complete body shall have a central lube kit,			
with all grease points brought out to the edge of			
the body.			
The side tilt floor shall be raised to reload the			
conveyor by use of two double acting cylinders.			
The conveyor is an integral part of the body floor			
and runs longitudinally down the driver's side of			
the body, discharging in front of the rear wheels.			
There shall be a <sup>1</sup> / <sub>4</sub> " <b>Hardox</b> 205,000 psi			
three section chain cover.			
The chain shall contain bar flights every link			
for greater strength and consistent material flow.			
A rear access plate with access to the conveyor			
chain in the rear apron.			
All chain links are protected by an integral chain			
guard leaving only the bar flights exposed.			
The chain shall be driven by a 25:1 ratio gearbox.			
The spinner shaft has a top mounted bi-rotational			
hydraulic motor to spin an 18" poly disc.			
The spinner assembly is chassis mounted and is both			
laterally and vertically adjustable and removable.			
A poly chute feeds the spreading disc. The chute is	_		
both adjustable and removable.			
All body parts will be Primed with rust inhibiting			
Epoxy primer and painted with epoxy Black.			
All hydraulic lines on the body will be ½" I.D.			
#304 stainless steel. Black iron pipe will not be			
accepted.			
Rear corner posts will be constructed of			
#201 stainless steel.			
Sideboards to be constructed of ¼ inch by 8			
bidebodias to be constitueted of 74 men by 6			
inches by 2 inches box tubing with welded
